CONDEMNED ANARCHISTS.

PREPARATIONS FOR THE LAST ACT IN THE HAYMARKET TRAGEDY.

The Second Illinois National Guards Will Be on Duty for a Week Previous to the Execution-Making the Shrouds and Caps-l'regram of Execution Day.

CHICAGO, Oct, 27.—Preparations are already being sliently made for the great anti-Anarchist drama of the 11th of November. Already orders have been given, it is said, to the members of the Second Ilinois National guard, that they will be required to be on duty for a fuil week, or perhaps longer, prior to November 11, at their armory, or wherever else their services may be required.

The probability is that the First regiment will be called upon to do the same. It is understood, however, that neither of the regiments will be called from their respective armories unless in case of absolute meed. It is also stated on authority that the entire block upon which the county jail and the criminal court building are located will be cordoned with police, and all the North Clark street buildings abutting on the jail will be guarded by officers, and no one allowed to enter them until after the execution of the condemned men. For the benefit of the great family of curiosity seekers who are ambitious to see their fellowmen swing into eternity, it may be stated that the sheriff has aiready, it is said, decided to limit the number of those present to those that the law requires to be present, and to a very few representatives of the press.

The gloom which has marked the condemned men, with one exception, for several days past, still continues to deepen. The exception is that of Parsons, who still indulges in his ohronic flippant good spirits and laughs and jokes with those who call upon him. The others, however, make no longer any attempt to conceal their feelings or to blind themselves to the fate which threatens them. It is stated by certain persons, who claim to have good reasons for what they say, that Governor Oglesby will grant the condemned men a brief respite, so that they will not be limited to a bare

fortnight to prepare themselves for death. On the morning of the day during which there shall be a probability of the United States supreme court's decision arriving in this city-probably Thursday morning-the guard upon the condemned will be doubled, or perhaps trebled, and the freedom which they have hitherto enjoyed will be materially curtailed. No one will be allowed to visit them at all. This latter precantion will be taken to avoid the possibility of auyone furnishing the prisoners with polson or other means of suicide.

Quite a sensation was caused yesterday among the inmates of the women's depart-Graining, Giazing and Paper-hanging. All work neatly and promptly executed. Office and shop, north side of Fourth between Market and Limestone, streets.

Some of the inmates were willing to do the work required, and were even anxious to participate in the ghastly task, but others were strongly opposed to rendering any aid, and these formed so large a of the lumates that it may be necessar will practice in the courts of Mason and ad- to have the work done outside the jail. The material-white uubieached muslin-has already been purchased. Each shroud will be shaped like a bag, only with holes in both ends and gathered close at the top. The hoods will be half a yard in width and about the same in length, gathered together at the top, which will be about ten inches across. The material is out into the necessary shape, and lacks nothing but the stitches that were asked of the motley crowd of women malefactors confined in the same prison with the seven death-sentenced Anarchista

It is rumored that Governor Oglesby will commute the sentences of Parsons, Fielden, Schwab and Fisher to imprisonment for life. The remaining three, Spies, Lingg and Engel, will have to pay the death penalty. A great pressure is being brought to bear on the governor, and hundreds of petitions and letters are received daily from all over the country.

Mr. Solomon Denice It,

WASHINGTON, Oct. 27.-A Chicago dispatch published yesterday, stating that Moses Solomon, one of the counsel for the Anarchists, telegraphed from Washington that there is little hope that a writ of error would be granted by the supreme court and that the whole matter would come back to Illinois to rest with the governor, is pronounced to be without foundation. Solomon said last evening: "I should indeed be lacking in courtesy to the other counsel in the case to have sent such a 'dispatch, but I have sent no such a one. In fact, my opinion is just the contrary to the sentiment expressed therein. I am more confident that the supreme court will grant a writ of error, because it is justified by the law, evidence and justice. I may add that my opinion is shared by Messra. Tucker. Pryor, Gen. Butler and other counsei in the case. No, we are far from being deepondent. but are quite the reverse." Mr. Solomon said that the Anarchists' counsel had not communicated with their clients since their arrival in Washington.

All the preliminaries are complete, and the various committees are now polishing of the minor details.

To-days's program consisted principally of receptions of the different visiting posts from Ohio, Indiana and Kentucky. The commander of the department of Kentucky reached the city to-day, and Commander Putnam, of Ohio, and Past Commander Carnahan, of Indiana, are expected to-morrow. Comrade Private Dalzeil has arrived and took up quarters at the Gibson house. Excursionists on the various roads are already pouring into the city.

pied soldiers. In the fourth wagon will appear several members of the Ladles Relief corps and G. A. R. comrades distributing charity to widows and orphans of deceased soldiers.

The fifth wagon will present a plantation scene—negroes singing and dancing as the emancipation proclamation is read to them. A six-mule team, drawing an old army wagon, will be filled with "Sherman's Bummers," and reproduce on a limited scale of magnificence the "March to the Sea" "How to Forage" will be spiritedly illustrated—live hogs, dogs, sheep and other game of a successful expedition being providel. "Sherman's Bummers' " wagon will

create no end of amusement. Following the bummers will be a venerabie ark representing the navy, fitted with jolly jack tara.

THE C., H. & D. TROUBLE.

The Road is Declared Inscivent and a Receiver to Be Appointed.

Hamilton, O., Oct. 27.-Judge Van Derveer to-day decide 1 the application of G. K. Duckworth for a receiver of the C., H. & D. railroad in favor of Duckworth. The principal findings are that the C., H. & D.'s assets are not more than \$5,000,000 while the liabilities are \$30,000,000. There is no money in the treasury to pay claims maturing. The com any is insolvent and the board of directors have no power to authorize Ramsey & Dexier to execute notes of syndicate to redeem Ives' claims was found agents when they knew Ives' bad standing, thereby the road sustained a loss of \$7,000,000.

By the purchase of the Terre Haute & Indianapolis company the control of the road, together with \$3,000,000, was lost through Ives, who now owns and controls more than two-thirds of the common ock and influence of the road. The directors were responsible to the stockholders for \$10,000,000 lost on the Terre Haute & Indianapolis deal. and \$7,000,000 owing to the transfer to New York of the effects of the company, and an action ought to be commenced against the one which shows the difference between directors to recover those amounts

Great and irreparable injury will be done unless the directors are restrained from the payment of the notes given and from enof the Ives claims. A receiver will therefore be appointed to settle up the complications and bring action against the directors ance of a continuous stem with minute serand avoid the necessity for the sale of the rations running around it, or in other words,

INTERESTING REPORT FROM THE BUREAU OF STATISTICS.

Surprising Number of Inquiries Regarding the Product From all Parts of the Country-Unly Three Nations Outstrip Us in Sheep-Washington Notes.

WASHINGTON, Oct. 27 .-- Chief Switzler, of the bureau of statistics, heaves a huge eigh of relief just now. He has completed and given to the world his "wool report," on which he has been so long engaged.

"I have given a great deal of work and patient in vestigation to this work," he said as he sat in his office wrestling with the iast pages of it, "and I flatter myself it will be of interest to a great many people. This bureau has certain regular duties in the way of periodical reports, but I have been trying since I came here to not only attend to those regular duties but at the same time undertake a number of special works, which should prove of value as an educational feature, and at the same time answer some of the constant inquiries I am receiving." "Was that the occasion of your report on

the wool production of the country !" "Yes. That is the very question that Secretary Fairchild asked me-'Why do you select wool for a special report?' I repited, 'Because I have so many inquiries about this particular subject. If I should get a great many inquiries, the year round, about infant baptism, I should feel called on to gather some facts about infant baptism and give them to the public. But I don't.
My inquiries, in the past year or so, have been about wool. They come from all directions and from a great many people and classes of people. That's why I have prepared this rep rt on wool.'

'Have you found the study an interesting one, Mr. Switzier P' "Very. And I think the facts as gathered

and compiled will interest a great many people. I know that I found them very instructive as well as interesting, and many

of them very hard to get."

The report, of which Mr. Switzier feels so justly proud, is a volume of 300 pages. It takes up the history of wool from the earliest period of its use for clothing, running back to the infancy of the human race, and tracing it on down through the various ages and countries, until the first sheep landed on American soil in 1609, when a few were brought from England and landed at Jamestown. A few years later some more wero brought over and landed in New England, and by 1640 there were probably 4,000 sheep

in this country. Now there are 45,000,000. Only three other countries of the world can size up alongside of us in the sheep growing industry. We have forty-five millions, but the Argentine republic has seventy-five milions, Russia has fity-seven millions, and Australia, in her various divisions, has more than sixty millions. Then we come in with our forty-five millions. purchase for the hypothecated stock. The According to Mr. Switzler's best estimates there are probably about 450,000,000 sheep grown considerably weaker for a few days to be not in the interest of the company but in the world, so that we, with our forty-five past. of private parties. Ives & Co. were made millions, have just about 10 per ceut, of the entire number in th

Our 45,000,000 sheep produce 280,000. 000 pounds of wool a year. To this we add 114,000,000 of pounds by importation. At least that was the amount imported last year, but over half of this was coarse carpet wool. Beside this we imported last year \$40,000,000 worth of woolen goods, manufactured abroad. The duty paid on the imported wooi, last year, was over \$5,000,-000, and the duty on imported manufactures of wool, \$27,000,000.

An interesting feature of the raport, is wool and hair. It may seem rather an odd subject, but it is one that will interest a

good many people. Wool white hair in one sense is, in its tering into the syndicate for the purchase formation, materially different. Hair placed under the mlcroscope is a strong but smooth cylinder, while wool has the appearseems to be a series of soft tiny oups, set one into another. It is this peculiar formation that enables the spinning of wool. The long wool, when spun into hard threads and woven closely, makes "worsteds," the shorter wool, when once spun and woven, is "fulled" up into a hard cloth and makes

Cassimares. 11 Thanksgiving Proclamation.

WASHINGTON, Oct. 27.-The following Thanksgiving proclamation was issued late Tuesday aftern on:

"The goodness and mercy of God which have followed the American people during all the days of the past year, claim their grateful recognition and humble acknowledgement. By His omnipotent power He has protected us from war and pestilence, and from every National calamity; by His gracious favor the earth has yielded a general return to the labor of the husbandman; and every path of honest toll has led to comfort and contentment; by His loving kindness the hearts of our people have been replenished with fraternal sentlment and patriotic endeavor and by His nnerring guidance we have been directed in the way National prosperity.

"To the end that we may, with one ao cord, testify our gratitude for all these blessings, I, Grover Cleveland, president of the United States, do hereby designate and set apart Thursday, the 24th day November mext, as a day of thanksgiving and prayer, to be observed by all the people of the land, On that day let all secular work and employment be suspended; and let our people assemble in their accustomed places worship and with prayer and songs of praise give thanks to our Heavenly Eather for all that He has done for us, while we humbly implore the forgiveness of our sins and a continuence of His mercy. Let families and kindred be united on that day, and let their hearts filled with kindly obeer and affectionate reminiscence be turned in thankfuiness to the source of all their pleasures and the giver of all that makes the day glad and

"And in the midst of our worship aud our happiness let us remember the poor, the needy and the unfortunate; and by our gifts our charity and ready benevolence, let us incrense the number of those who, with grateful hearts, shall join in our than kegiving.

A RAILROAD MEETING.

Apnual Meeting of the Big Four Stocke holders at Indianapolls.

Indianapolis, Ind., Oct. 27.—The annual meeting of the stockholders of the Cincinnati, Indianapolis, St. Louis & Chicago was held at the company's office in this city as 12 o'clock yesterday, Gen. T. A. Morris acted as chairman of the meeting. Fortynine thousand one hundred and eighty-five shares were represented, and the following directors were elected: George Hoadiy, George Blisa, J. Pierpont Morgan, R. R. George Biss, J. Pierpont Morgan, R. R. Cable, Thomas A. Morris, Orland Smith, B. J. Broadwell, C. P. Huntington, Lars Anderson, E. T. Jeffery, A. M. Fletcher, Alex. McDonald, M. E. Ingals. But one change was made, that of substituting Alex. McDonald for George Wishire, who resigned. Mr. T. A. Morria, of this city, who was re-elected a director, has served as a director of this road for thirty-six years, being elected to that position when the road was built from Greensburg to Iudianapolis. The directors then elected the following officers for the ensuing year: M. E. Ingalla, president; E. F. Osborn, vice president and treasurer, and J. C. Davie, secretary.

The party left at 2 o'clock for Chicago,

and made the run in five hours. The run from Ciucinnati to Indianapolis was made in three hours, and seemingly with perfect ease, which satisfies President Ingains that It is practicable to put on a limited express to make the run from Cincinnati to Chicago In eight hours, should it become necessary for him to do so to take care of competitors.

Probably, Result in a Strike.

St. PAUL, Minn., Oct. 27.-The railroad employes of Munesota view with alarm the repeated reduction in freight rates, as they ear it will tause a reduction in salaries and aumber of men employed. In order to protect themselves they have formed a secret organization, which is sald to have one hundred thousand members. They hold that the rails and commissioners are responsible, and that the reduction is for political effect. Should a further reduction be made an immense strike is not unlikely.

WRITING REFRACTORY WORDS.

Curious Silps in the Cogs of Mental Muchlnery-A Writer's Experience.

Dr. Holmes has written something about it, as he has about everything else that is odd and interesting. But it is a subject that remains forever with the man who has much occasion to adjust his thinking machinery with the physical machinery of writing, and who has found out that there are certain cogs in one set of machinery or the other that always sllp. The Listener, for instance, never writes the word "by," unless his mind is specially upon the writing of it, and each letter is written with a separate act of volltion, without first writing "but" ami scratching it out; and vice versa, he seldom writes "but" without first writing "by." 'The word "Egypt" is invariably refractory, and will not be written correctly the first line. So is

the word "eighth." A gentleman of the Listener's acquaintance has the same difficulty with "for" and "from" that he does with "by" and "but," and still another is generally floored by the words "than" and "that," writing one where the other should be. The first gentleman always, writes "Duch" for "Dutch," going back and putting in the t afterward; and the second nvariably writes "common wealht" or "commonweathl" before he can get the word right. The first cannot write the word "nomenclature" without stopping to think about it. Still another, a man of books, has the same difficulty with the word "Egypt" that the

Listener has, except that he writes it 'Eygpt," while the Listener writes is "Egupt;" and he has the additional peculiarity, which is worth noting, that when be reaches the letter r which occurs in his signature, he is always compelled to stop and think, or else he will make a superfluous stroke which will turn it into another letter. This regular hostile encounter with a refractory letter in his own signature he finds pecu-

liarly vexatious. The Listener has not attempted to formpate a theory for this peculiarity, but is inclined to tie opinion that, in the majority of cases, it is due to physical habit—a trick of the nerves or inuscles; that has become practically incorrigible. In the base of the word Egup-there it goes againt-Egypt, the inherent difficulty of a word which has three letters in succession involving a stroke below the line is evidently to be blamed rather than any physical trick; but in the invariable writing of "by" for "but," and "for" for "from," and vice versa, certainly the blame is not to be placed upon the word. Perhaps the type writer will cure us all of the trick when we finally give up writing with the pen, and perhaps it will not. There are a good many evidences that the type writing machine simply multiplies the errors of the hand writing. One fluids involuntary and grams in every page of some people's type writer manuscript, and one friend of the Listener, who writes with a machine, says that he occasionally writes a word exactly buckward-"kealb" for "black," for instance, and cannot imagine how in the world be manages to do "iti-Boston Transcript "Listener,"

NEWS FROM OVER THE SEA

THE FRENCH ARMY TO HAVE THE BEST GUN IN EUROPE.

Both England and America Obliged to Watch the Practice of the French Army New Supplied With the Lebel-They are Fast Manufacturing the New Gus.

Lordon, Oct. 27 .- The French war departiment is pushing forward as speedily as wible the manufacture of the new magadee rifle. The workshop, now in course of metruction at Chattellerault will be finached by the beginning of the next year, and the number of guns made daily will then be trebled. Accusations have been made against Gen. Ferron, minister of war, of lack of patriotism or indifference as to the needs of the French army in diminishing the credit asked for the ensuing year, but with the surplus remaining of the amount voted for 1887, the sum demanded will be amply sufficient, the general's supporter's assert, to push the fabrication of the new gun and the new cartridge to the full capacity of the works.

The French journals, which all affect a confident understanding of inlintary affairs, secure us that the new magazine rifle, the lebel, will give the French army when furnished with it, a striking and undeniable experiority over the armies of Europe.

Allowing for natural French exaggeration, it seems that the new gun is partially at least a success. Certainly it is the best one now in the field, and as there is no doubt that ali armies, in order to contend upon an equal footing, must at once be furnished with repeating arms, both Europe and America must watch with much interest the practice of the detachments of the French army now supplied with the iehel.

As a matter of course first accounts are conflicting. German military journals, like the Miltar Woehenbiatt, are confidently assured by their correspondents that the lebel is a complicated arm which gets quickly out of order and that the target aring of the French with it is execrable. One point asserted seems to be founded upon a familiarity with results, but it must apply equally to all magazine arms, namely: That as the cartridges are expended there must be an alteration in the balance of the piece, ewing to a constant diminution of weight at one end, thus causing an uncertainty of aim because of a variation of range. The ealibre of the lebel is eight millimetres, the bullets are of steel and 'the composition of the explosive is claimed to be a secret known only to the French war department, but as the consumption causes very little smoke it to probably similar to that of the "wood" powder, the efficiency of which is a matter

The recoil of this gun is much less than than that of the ordinary arm, and a greater number of cartridges can, on account of their smailer weight, be carried by the sol-

A former officer of the United States army, who has witnessed trials both of the Lebel rifle and the Mauser, with which the German troops are being armed, states that there is but little difference between the two guns in point of efficiency, but that the French soldiers appear to learn the mechanism of their arm quicker and to be more dexterous in its use.

L'Avenir Militaire says that the Geman Mauser rifle has one serious defect in that the extractor lever is fragile, and that the Teutonic soldier is too inherently clumsy with his fingers to successfully munipulate such deficate mechancism as enter into the make of his new magazine rifla. One thing appears certain from trustworthy sources as to the practice of both guns, that accursey of aim must be sacrificed to ensure an increased rapidity of firing.

Riot Act Read in Cork, CORK, Oct. 27.-Mr. John Dilion was escorted to the railway station last evening by a large crowd, who sang patriatic songs while passing the police barracks. The police sailied forth and piled their batons upon the heads of the crowd, regardless of consequences. Mr. Dillon was about to address the police and the crowd when a magistrate appeared and read the riot act. Upon the advice of Mr. Dilion and the mayor the

crowd dispersed. Battle on the Servian Frontier. BELGRADE, Oct. 27 .- A party of Albanian brigands attempted to make a raid in Narvio, a smail town on the frontier of Servia, yesterday. They were met by a force of frontier gnards and an engagement took place between them. Twenty of the hrigands and ten of the guards were killed. A reinforcement of guards has been sent to

Won the Dewhurst Plate. LONDON, Oct. 27. - Friars Balsam, owned by Sir Frederick Johnson, won the race to-day for the Dewurst plate. The race was ran over the last seven furiongs of the Rowley Mill at Newmarket and he carried the top weight of 131 pounds. Friars Balsam will now be retired for the season.
